

Chemical Economy & Engineering Review

January 1976—December 1976

January/February 1976 Vol. 8 No. 1, 2 (No. 92)

Role of Technology Transfer in the Structural Reform of International Economy	by Kunio Goto.	7
Present and Future of Fuel Cells	by Shosaku Hattori.	13
Aspects of the French Chemical Industry	by Staff Writers.	20
Present State and Future of Synthetic Rubber Industry	by Shinnosuke Katsumoto.	23
Development and Application of Boron Nitride	by Tadashi Matsuo.	29
Technical Development of Melamine Manufacture by Urea Process	by Akihiro Shiroishi and Yasuo Takakuwa.	35
Environmental Problems and Legislation Trends in Japan	by Sadao Itoh.	40
News Scope		
Cryogenic Science and Technology		51
Hydrogen Through Water Cracking		52
Development of New Hydrogen Technology		52
1976 Trade to Grow 5-6%		53
Agreement Chantiers de l'Atlantique-Coppee-Rust for the Realization of Floating Ammonia and Urea Plants		53
M/T "Bow Fortune"—The World's Most Sophisticated Chemical Carrier Calling Japan on Maiden Voyage.		54
Dehydration Accelerator for Wet Ore Concentrates		54
Entry into Engineering Service.		54
Business World		
Nuclear Energy . . . 57/Ocean Development & Petroleum . . . 58/Chemical Industries . . . 58/Plant Engineering . . . 59/Steel & Other Metals . . . 60		
Index to Advertisers		56

March 1976 Vol. 8 No. 3 (No. 93)

An Analysis of OPEC Oil Demand and Supply (1974—85)	by Toshihiko Kinoshita.	7
Prospects for World Fertilizer Supply and Demand, and Food Production	by Kei Nishiura.	12
Development of New Coke Oven Gas Desulfurization Process "Ammonia Takahax-Wet Oxidation Process"	by S. Ozaki, M. Iguchi, H. Atake, M. Matsumoto, R. Koike and Y. Nagashima.	22
Recent Technological Trends in Petroleum Resin	by Akira Taketa.	26
Trends in Recent Techniques for Unsaturated Alcohol	by Haruo Igo.	31
News Scope		
World Petroleum Industry Spends 119 Per Cent More Than It Earns.		36

C-E Lummus to Develop and Market Cities Service's Residual Upgrading Process	37
LPG Plant to China in Exchange for Oil.	37
Water Treatment Process to the Netherlands	38
New Pharmaceutical Synthesis Plant at Landen in Belgium.	38
Kenya Pipeline Construction Awarded to NKK —Includes Technology for Liquid Flow Control—	38
Montedison and Mitsui Petrochemical's Great Progress in High Activity Catalysts for Polypropylene	39
New Plant, New Process, New Product	
50,000 Nm ³ /h Flue Gas Denitrification Plant.	39
Caustic Soda Refining.	40
Jackup Rigs Delivered.	40
Business World	
Nuclear Energy . . . 41/Ocean Development & Petroleum . . . 41/Chemical Industries . . . 42/Plant Engineering . . . 46/Steel & Other Metals . . . 48	
Index to Advertisers	44

April 1976 Vol. 8 No. 4 (No. 94)

How to Cope with Sulfur in Steam Cracker Feedstocks —Integration of HDS-unit with VNI/AGO/VGO Crackers makes AGO and VGO Competitive—	by Alfred Mol, Benno de Moet and Joop Draaisma.	7
1976 Outlook Brighter in U.S. and European Chemical Industries	by Sadao Taguchi.	14
Present State of Art of Specialty Chemicals in Japan and Future Outlook	by Kenji Nukushina.	16
Industrial Surfactants—Present Situation and Future Prospects	by Dr. Takao Kariyone.	27
Development of TSP Process Production Techniques for High-purity Phosphoric Acid	by Masaki Takahara.	31
Development of Computerized Pigment Blending System (Colorcom System)	by Kazuo Sano.	39
News Scope		
World Economy Will Upturn This Year		44
Production of Olefines from Heavy Fractions		45
Annual Survey in World's Ethylene Production		45
Overseas Petrochemical Projects to Be Reorganized		46
Linde Olefin Plant for Portugal.		47
Nuclear Energy Industry Under Cost-Push Pressure—Report Outline State of the Industry in Fiscal 1974		47
Safety Design for High-temperature Gas Reactor		48
Start-up of a Linde-Peakshaving Plant in the U.S.		48
CAL-SOX Flue Gas Desulfurization Plant		49

Accumulated Technology

Throughout the whole 90 years company history, Nissan Chemical Industries has never yielded its leading place as a pioneer of advanced chemical technology. This unique technical innovation points the way ahead, to a new era in which Nissan Chemical Industries is sure to play a proud continuing role.

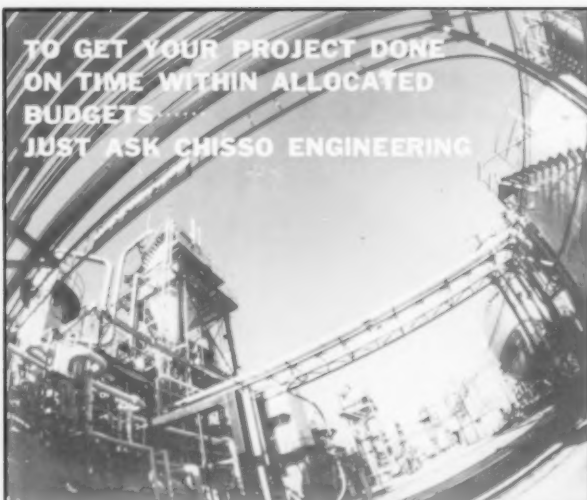

Industrial Chemical / Special Chemicals / Petrochemicals / Plastics /
Fertilizers / Agricultural Chemicals

NISSAN CHEMICAL INDUSTRIES, LTD.

Kowa Hitotsubashi Bldg., 3-7-1, Kanda Nishiki-cho, Chiyoda-ku, Tokyo Tel: 296-9111

**TO GET YOUR PROJECT DONE
ON TIME WITHIN ALLOCATED
BUDGETS.....
JUST ASK CHISSO ENGINEERING**

WE CAN OFFER UP-TO-DATE PROCESSES
LICENSED FROM LEADING COMPANIES.
FOLLOWING ARE JUST EXAMPLE.

Polypropylene
Nitrobenzene, Phosgene, Aniline,
MDI, TDI, PO, PG, PPG
Phthalic Anhydride
Isopropanol
Pentaerythritol, TMP, Neopentyl-
glycol
Polyvinyl Chloride
Ultra Pure Metallic Silicon
Polypropylene Fiber
New Electric Heating Method for
Pipe tracing ("SECT" Method)
Plastics Processing Systems, etc.

CHISSO ENGINEERING CO., LTD.

Manufacturing technology now available at Asahi Chemical Industry for the following:

- Acrylic fiber (Cashmilon®)
- Viscose rayon
- Nylon 66 raw material
AH salt, Hexamethylenediamine, Adipic acid, Adiponitrile
- Acrylonitrile monomer
- High-density polyethylene (Suntec®)
- Continuous ion exchange process
- APR® plate-making system
- Methyl acrylate
- Monosodium glutamate
- ABS resin
